

# 2025 COLLECTION SYSTEMS AND STORMWATER CONFERENCE

 July 15-18, 2025  George R. Brown Convention Center | Houston, TX

## Sponsorship Prospectus

Given the continued challenges to our nation's collection and drainage systems, including climate change-driven severe wet weather events, professionals in the stormwater and collection systems fields will meet once again at this combined conference.

WEF is excited to present the 2025 Collection Systems and Stormwater Conference, which will welcome water professionals to Houston, Texas, for an exciting conference focused on design and operations of wastewater collection systems, as well as wet weather control and stormwater management.

This conference will include oral presentations, interactive discussions, pre-conference workshops, exhibits, technology spotlights, and opportunities for networking in dynamic settings with utility and water industry professionals, consultants, technology specialists, academics, and other water leaders.
